- 4. When prompted, select 'Run' and the download will start the installer when finished.
- 5. To install the client, click on Next through the prompts and Accept the license agreement when asked. Click Finish when done.
- 6. (Optional) The client is preconfigured from the manufacturer to start when Windows starts. To disable this behavior, follow the appropriate steps for your operating system.

- a. For Windows 8 and 8.1
 - i. Press CTRL+ALT+DEL and select 'Task Manager'
 - ii. Navigate to the 'Startup' tab, highlight the line that says 'Cisco AnyConnect User Interface' and click 'Disable' at the bottom

- b. For Windows 7
 - i. Open the start menu, and type 'msconfig' into the 'Search for programs and files' box and press Enter
 - ii. Navigate to the 'Startup' tab, and uncheck the box next to 'Cisco AnyConnect User Interface' and click Ok. Select 'Exit without Restart' when asked.
- 7. After the client is installed, to connect to the VPN, open Internet Explorer, navigate to <u>https://vpn.columbusregional.com</u>, and log in with your NTERPRISE credentials.
- 8. If you are prompted with a security warning, check the box and select 'Allow'

- 9. You should now be connected to the VPN.
- 10. When done, click on the 'locked globe' by the clock to bring up the VPN window, and click 'Disconnect'
